

Welcome to

East London Energy

The sole supplier of efficiently produced energy to meet the heating and hot water requirements of the East Village and all other developments on the Olympic Park.

All East Village apartments are connected to the Queen Elizabeth Olympic Park District Energy Scheme, the largest of its kind built in the UK.

This means that your heating and hot water is provided from sustainable energy sources on your doorstep that were constructed ready for the Olympics and designed to have capacity to meet the energy needs of the entire Olympic Park and surrounding areas.

Whilst your property will not be connected to a gas supply, you can rest assured that your tariffs are closely regulated to ensure that they remain competitive in comparison to operating a gas boiler. This also means that you do not have the hassle of a gas boiler in your property and the associated maintenance and safety checks.

If you decide to come and live in East Village, you will receive a Welcome Pack and our Residential Supply Agreement which explain more about our services and what you can expect from us.

To find out more about East London Energy

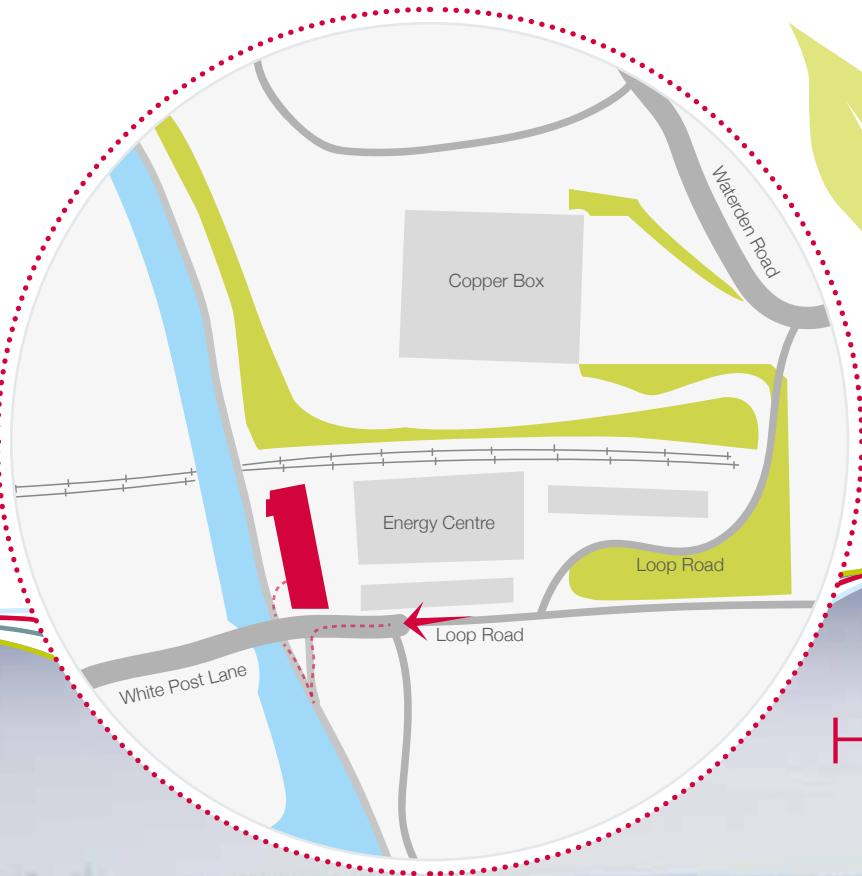

why not pop into our Visitors Centre at Kings Yard which is located just across the Queen Elizabeth Olympic Park from East Village at 1 Waterden Road or visit our website at www.eastlondonenergy.co.uk

These energy sources provide carbon emissions savings of at least

25%

over traditional forms of heat generation.
